

ELTHAM SHOW

12 February 2011

Judge: Sheila Sowter

This was the first time I have judged at Eltham. It is a good venue for a rat show, good light, relatively easy to find, plenty of public transport and an adjacent shopping centre to entertain anyone who does not have to spend their time entirely with the rats.

There was an interesting spread of rats. The standards state that does should be 'long and racy' and there were too many does who were plump. Some of the bucks needed a slimming diet as well. This was one of the shows where as soon as I set eyes on the BIS I thought she might be the eventual winner, or at least well up in the challenges. Indeed there was nothing better than Ann Storey's squirrel. Congratulations on a lovely rat. The adults took all the places in the supreme challenge with Kate Ford's nice cinnamon RBIS. Many of the kittens were not old enough to have reached their variety standard. BOA went to Ann Storey for a promising agouti kitten. Congratulations to all.

Hearty thanks to my steward and the show secretary. Both of them were a pleasure to work with. It may not be apparent how much the judge depends on show secretary and stewards, They can sometimes make the judge's life a misery. Natasha Klus nominally as steward was also sitter-in and scribe and general righthand woman. (She had even baked cakes for the kitchen.) Jo Pierre was, for me, an ideal show secretary, providing an up-to-date set of standards, telling me at the start when we had to be out of the hall (and also when she hoped judging would be finished) and collecting the result slips in a relaxed manner so I could judge at the necessary speed without feeling under pressure. Thanks very much for your support Jo and Natasha.

NEW VARIETIES (2): 1 (01), 2 (02) both Tanya Manuel-Warner. These were both 'quick silver'. Quicksilver itself is a silver metal with not the slightest trace of blue. The standard defines it in terms of what it is not, it's a blue rat that is different from other blue rats. (01) was a quick silver dumbo rex who enjoys his food. His coat was blue but had yellow buck grease on his skin which made it difficult to judge the colour of his nice back curls against the yellow. Tail thick but shortish, ears had slight crease. Eyes very dark ruby. (02) a quick silver dumbo also enjoys his food. Undercoat colour noticeably different from top colour and buck grease also present giving the undercoat a yellowish tinge. Tail thick but short, Dumbo ears slightly creased.
